

one session: one process, one private copy of the game

Agent

any model, any harness
HTTP client and a brief
of one page

keys

Session worker

control API: screen, key
one action at a time; a key is held
for emulated frames, then settles

input

Emulated machine

DOSBox Pure, in-process
the 1996 game
320 × 200 framebuffer, 70 fps

frames

frames

events

Recording

append-only journal of changed
16 × 10 tiles and every key
with its hold

render

Public run

replay, video, metrics, catalogue

machine image; game-written save

measurement, read-only; no control call returns it

Progress readers

machine image: character records, bag
game-written save: party, world square
the release archives as controls

level, experience, party, books
